Senior Full Stack Developer

Data Products is a Data Science boutique consultancy and R&D firm. We partner with organizations to deliver a tailored approach and unparalleled collaboration in data science, data strategy, machine learning, artificial intelligence, and analytics. Our focus is on educating clients on varying aspects of data and modern technology, building up analytics skills, data competencies, and optimizing their business operations. We help small and medium-sized organizations accelerate and progress their digital initiatives by providing proven, practical, and cost-efficient IT solutions and Data Science & Emerging Technology consulting services.

We are currently seeking a Full-Stack Developer who is eager to jump into the data science field. You will be responsible for maintaining and adding new functionality to existing projects as well as help assist in prototyping concepts and ideas.

This is a full-time, fully remote position.

Job Responsibilities:
- Maintain existing projects
- Add in new functionality to existing projects
- Document any work being done so all project documentation is up to date
- Research and solve problems that might arise from specific design or limitations
- Work closely with the development team and owners
- Participate in standup calls and code reviews

Qualifications:
- Knowledge and experience working in Python (with Django)
- Have deployed at least one professional Python/Django project
- Working knowledge of Angular.js and Node.js
- Minimum of 3 years of experience working as a Full-Stack Developer
- Expertise in HTML5, CSS3, and JavaScript
- Proven ability to work in a fast-paced environment with tight deadlines while being detail-oriented
- Demonstrated strong verbal and written communication skills
- Demonstrated documentation skills
- Must be able to maintain confidentiality
- Self-Starter who is a strong team player and takes ownership
- Have worked in a DevOps environment

We are looking for creative, goal-oriented experts who are passionate about their work. To apply for any of our open positions, please send your resume to jobs@dataproducts.io or fill in the form below.
